

## NEW FURNACES DATA SHEET

# RETORT TEMPERING FURNACES – ZEROFLOW® NITRIDING

Vacuum furnaces for  
tempering and zero flow  
nitriding – cost effective  
nitriding with low emissions

## TECHNICAL INFORMATION

- Horizontal- and vertical-loading furnaces
- Load from 200 to 2,500 kg
- Electric or gas heating (E/G)
- 150 – 1500°C
- 20 years of experience from Seco/Warwick and Camlaw
- Short heating and quenching cycles
- Quenching system with internal retort quenching and/or external quenching
- Profiled thin-walled retort, reducing heating and cooling costs
- Automatic closure of vacuum/high pressure door
- Optional ZeroFlow® gas nitriding
- Computer control system
- Complies with CE and NFPA
- Compact construction with small installation area

We represent Seco Warwick (one of the largest furnace manufacturers in Europe) for their range of Vacuum and Atmosphere furnaces, and are sure to have the type of furnace you require within their product range – see [www.secowarwick.com.pl](http://www.secowarwick.com.pl)
